Reconstructive Surgery of the Shoulder, Elbow and Wrist

An intimate didactic and hands-on laboratory course
with limited registration

www.HandFoundation.org

COURSE DESCRIPTION

An up close and personal experience in the reconstruction and rehabilitation of the upper extremity from a world renowned faculty.

The course encompasses both acute fractures and secondary reconstruction. Clinical topics address and critically assess the latest clinical management of shoulder fractures, instability and replacement. Similarly, elbow topics range from complex trauma through contracture and other soft tissue problems to arthroplasty. The final two days emphasize the new developments in the treatment of distal radius fractures, including analysis and recognition of fracture patterns, optimization of fracture stability, options for fracture fixation, recognition and treatment of distal radioulnar joint injuries, treatment of associated carpal and soft tissue injuries. In addition, the course will cover prevention and treatment of complications as well as correction of malunions and both wrist and distal radioulnar joint arthroplasty. Didactic lectures, panel sessions, video surgery demonstrations and hands-on labs will provide the participant with the vital information to treat these problems.

Centrally located at the base of Snowmass Mountain and the Village Mall, The Viceroy Hotel is an incomparable vacation resort. Ski-in/ski-out with onsite equipment rental and ski valet, an all-season heated saline pool, terrace cabanas, signature lobby cocktail bar and lobby-side lounge, refined Latin contemporary dining at Toro Kitchen and Lounge with stunning views, Nest lounge/café, health club, steam room and massage service, concierge, exemplary service and more all contribute to the total convenience you will experience when you stay at the Viceroy Hotel.

**Sponsored by the University of Colorado School of Medicine Office of Continuing Education
Presented by the Hand Rehabilitation Foundation**

1. Define complications of traumatic injuries of the upper extremity and know how to avoid them as well as how to treat them when they occur.
2. Diagnose rotator cuff tears; to recognize the indications for surgical alternatives; and to perform surgical and reconstructive procedures which will restore rotator cuff function.
3. Evaluate and classify complex elbow fractures and determining the best course of treatment.
4. Utilize the latest surgical techniques for shoulder reconstruction including resurfacing arthroplasty, hemi arthroplasty and total shoulder arthroplasty.
5. Understand and perform the varying surgical options for elbow, wrist and hand fractures and dislocations.

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of The University of Colorado School of Medicine and the Hand Rehabilitation Foundation. The University of Colorado School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

The University of Colorado School of Medicine designates this live activity for a maximum of **21.25 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
